STAARS Vendor Self Service

Commodity Codes – Professional Services Codes

Introduction

Commodities use a structured list of codes from the National Institute of Governmental Purchasing (NIGP) that identify ordered items. The first three digits of a commodity code are the Class number. The last two digits are the Item number.

This document lists the commodity codes used to identify professional services products and services. Therefore, all five-digit codes have PRF as the Class followed by the two-digit Item number.

Please note that this list is current as of May 2020 and is subject to change. Direct any questions to financialsystems@comptroller.alabama.gov.

Codes and Descriptions
